

Melting Clock Hat

*Wear Dalí's most famous
Image on your head!*

Materials List: 11 x 17 67# vellum bristol.
Two-sided mirror image copy of clock on lightweight
Vellum Bristol card stock . Scissors, stapler, 30" any color
ribbon or yarn, 1/4" hole punch and optional markers/crayons.

How To Do It

1. Staple two mirror images together.
2. Cut out clocks through both layers.
3. Color each side if desired.
4. Punch 1/4" hole at bottom edge, both sides, *see photo.
5. Match up the two sides of hat.
6. Staple close to top edge every 3" all the way around from knob to bottom curve of clock, leaving bottom edge open.
7. String 15" ribbon through each hole and tie off with a knot.
8. *Watch out! Its time for fun!*

The Craft as it relates to Salvador Dalí and his work

The Persistence of Memory, 1931 Oil on Canvas
Museum of Modern Art, NYC

Salvador Dalí
was famous for
painting repeated
images of
melting clocks.

The Disintegration of the Persistence of Memory
1952-54 Oil on Canvas St. Petersburg, FL

Dalí produced two paintings twenty years apart. Both were very similar but the second one, painted in 1952-54 reflected the scientific theories of his era including Werner Karl Heisenberg's theories of quantum physics and Albert Einstein's theories of space and relativity. Dalí transformed the foreground of his second work into pixelated floating atomic particles. Since time was constantly changing Salvador Dalí felt it was uncontrollable. You can find this famous painting in our collection. Use this activity to make a Dalí style clock. Rearrange the hands to learn more about time.
